

Crestron HDMI Switchers

Even the simplest content distribution deserves the best

Tired of swapping HDMI® cables? There's a better way. With Crestron HDMI switchers you can easily select and route multiple sources with no programming. They provide an efficient room solution for the most common content distribution needs, right out of the box. You get support for the latest video formats, industry standards, enterprise-grade security, and network-based management. Crestron HDMI switchers are a key building block of any video distribution solution.

KEY FEATURES

- 4K60 4:4:4 and 18gbs
- HDR10+ and Dolby Vision® support
- Integrated display control via CEC without programming or a control system
- Auto-routing and priority routing
- Audio de-embedding
- Enterprise-grade security (802.1x, Active Directory® user authentication, TLS, HTTPS)

USE CASES

- Add HDMI switching capabilities to rooms and systems without programming or disruption
- Simple standalone room solution to route multiple sources to display destinations with CEC control
- Full integration with larger DM® systems, UC applications, and video walls
- Build out a complete room system or easily upgrade the number of connected devices
- Cost-effectively expand control, distribution, and collaboration through cross-solution integration, such as with Crestron AirMedia® wireless presentation technology and Crestron Flex UC solutions
