

CONTROL THE ROOM

Crestron® touch screens & Logitech® video conferencing

Building a Logitech video conferencing system? Now you can add the touch screen designed by IT for IT. Crestron touch screens integrate with the Logitech Rally™ video conferencing and Logitech Meetup offering a degree of control that goes beyond the conference call. All designed to give IT professionals just what they want from touch screen technology—simplicity, consistency, efficiency and flexibility.

Explore more of the advantages of the Crestron TSW at crestron.com/logitech

TOUCH SCREENS DESIGNED BY IT FOR IT:

- Uses standard cabling—nothing unique, or proprietary
- Connects via POE/POE+ network power
- Protects your network with the highest levels of security protocols

DELIVERS ONE EXPERIENCE EVERYWHERE:

- Every touch screen looks the same and works the same

HELPS IT MANAGE MORE FOR LESS:

- Provision, manage and update all devices via Crestron XiO Cloud® service
- Control every panel remotely—reduces the need to deploy valuable resources

GOES BEYOND UC:

- Integrates with smart rooms controls
- Offers the ability to architect with multiple touch panels
