

1 Beyond Cameras

Clearly capture everyone in the room.

Key benefits

- Broadcast-quality video and optical zoom ensure clear, crisp view of everyone in the room
- Industry-leading visual AI intelligently frames in-room participants
- Multi-camera support captures every angle
- Can be used as part of a room solution or standalone
- Simple to install, deploy, and use
- USB, NDI|HX, HDMI® connectivity, and SDI outputs for compatibility with any video platform

Get closer

Clearly better hybrid meetings start with seeing everyone clearly. With 1 Beyond PTZ cameras' broadcast-quality video and optical zoom up to 20x, you can bring in-room participants closer without losing resolution — even the people furthest away from the camera. Deliver a premium experience for both in-person and remote participants that matches the level of professionalism of the meetings held in those spaces.

Make your largest spaces feel intimate and every interaction immediate

i-Series cameras feature built-in group framing and presenter tracking which ensures all participants can be seen and are centered in the frame. 1 Beyond cameras paired with Crestron Automate VX™ technology adds multi-camera speaker tracking.

Switch cameras automatically with built-in Visual AI

Some meetings, such as presentations with an audience, require more than a single static view. Visual AI automatically performs switching between two i12 model cameras to keep the action front and center. Or manually control them from your touch screen.

Flexibility to use as part of a room solution or standalone solution

Works with Microsoft Teams® Rooms and Zoom Rooms® software, 1 Beyond cameras bring a one-touch join experience to your medium and large rooms with clear, crisp intelligent video. Add to your Crestron Flex systems or any other existing rooms with videoconferencing. Or add speaker tracking with Automate VX™ technology.

Beyond simple to install and deploy

1 Beyond Camera Manager software makes setup and monitoring quick and intuitive. Connect to your video conferencing system via the array of standard outputs. Install any way you want — upright, wall-inverted, wall-stacked, or ceiling-inverted — using our patent-pending universal mount.
