

## Statement of Memory Volatility for RMC-3

### Volatile and non-volatile memory information/configuration:

Type of Memory	Size of Memory	Purpose of this Memory	Data retention after power off Note 1	User data Note 2	How is data input to this memory?	How is memory protected from accidental overwrite by the user? (e.g. Password, Jumpers, Switch settings, Software) - Enter N/P if it can't be write protected.
1. SD CARD Internal J10	4 Giga Bytes	Firmware OS	Yes	No	Special software required	Software
2. SDRAM U4-DDR3	256 Mega Bytes DDR3	Temporary Storage	No	No	User programs	N/P
3. EEPROM U47	512 kilo Bytes	Device Config FPGA	Yes	No	Special software required	Software
4. SRAM U8-FPGA	576 kilo Bits	Device Config FPGA	No	No	Special software required	Software
5. SRAM U8-FPGA	90 kilo Bits	Device Config FPGA	No	No	Special software required	Software
6. EEPROM U8-RTC	7 < > Bytes	System Config	Yes	No	Special software required	Software
7. EEPROM U7-aup	176 kilo Bytes	Boot Code	Yes	No	Factory Loaded	HW

Note 1: Can user data, i.e. Audio, Video, documents (Word, pdf etc.) or spreadsheet retain after power down?  
 Note 2: Can user data, i.e. Audio or Video, documents (Word, pdf etc.) or spreadsheet be written to this memory during normal operation? User settings and operational parameters such as volume setting, IP address etc. are not considered User data on this declaration. Only Audio, Video, documents (Word, pdf etc.) or spreadsheet is considered user data.
