The HD-TXU-4KZ-211 is a DM Lite® 4K60 4:4:4 transmitter designed to pair with a DM Lite® HD-RXU-4KZ Series receiver. The paired transmitter and receiver enable extension of HDMI® or USB-C® DisplayPort™ AV signals along with USB 2.0 data. This is useful in applications where an AV source is located remotely from its destination, such as a display, projector, or codec solution. A CAT5e or higher twisted pair cable must be used to connect the HD-TXU-4KZ-211 to the DM Lite receiver.<sup>1</sup>

### Interoperability with HD-RXU-4KZ Series Receivers

For interoperability between the HD-TXU-4KZ-211 and an HD-RXU-4KZ Series receiver, the DM Lite output port of the HD-TXU-4KZ-211 must be connected to the DM Lite input port of the HD-RXU-4KZ Series receiver.

**NOTE:** USB 2.0 data extension is not supported if the HD-TXU-4KZ-211 is paired with a DM Lite receiver other than an HD-RXU-4KZ Series receiver or paired with a DMPS Lite™ switcher.

### 4K60 4:4:4 and HDR Support

The HD-TXU-4KZ-211 supports video resolutions up to 4K60 with 4:4:4 color sampling. HDR10, HDR10+, and Dolby Vision® video formats are also supported.<sup>2</sup>

### Integrated Web Server

The HD-TXU-4KZ-211 includes a web server for device configuration and management. The web server also enables device, network, and other types of status information to be viewed.

### Automatic Switching of Inputs

The web interface of the HD-TXU-4KZ-211 or control system programming can be used to configure AV switching behavior. Switching between the HDMI and USB-C DisplayPort inputs occurs based on the last connected input or on the routing priority assigned to each input. In addition, input selection push buttons on the front of the HD-TXU-4KZ-211 enable the desired input to be selected manually.

### USB 2.0 Data Extension

Two USB 2.0 host ports and one USB 2.0 device port are provided on the HD-TXU-4KZ-211, enabling connection to a wide variety of supported USB 2.0 peripheral devices.<sup>3</sup>

### Compact, Surface-Mountable Design

Compact in design, the HD-TXU-4KZ-211 can be mounted onto a flat surface such as the underside of a table, behind a credenza, or inside a podium. It can also be attached to a single rack rail in the back of an equipment cabinet. The HD-TXU-4KZ-211 receives power from the included power pack.<sup>4</sup>

## DM Lite® 4K60 4:4:4 Transmitter and 2x1 Auto-Switcher for HDMI®, USB-C® DisplayPort™, and USB 2.0 Signal Extension over CATx Cable

1. For DM Lite connections, use Crestron DM-CBL-8G, Crestron DM-CBL-ULTRA, or third-party CAT5e or higher cable. For information about the maximum transmission distance for each cable type, refer to [Online Help Answer ID 1001567](#).

To safeguard against unpredictable environmental electrical noise that may impact performance at resolutions above 1080p, shielded cable and connectors are recommended for all applications and are required when bundling multiple cables in a wire run. Cables are sold separately.

2. For HDMI inputs, 4K60 4:4:4 performance and HDR support require the use of HDMI cables and couplers with a minimum TMDS bandwidth of 18 Gbps. If 4K60 4:2:0 or 4K30 4:4:4 performance is acceptable, cables and couplers with a minimum bandwidth of 10.2 Gbps may be used. Bandwidth loss is cumulative; therefore, performance may be reduced when inserting multiple cables and couplers inline.

For USB-C DisplayPort inputs, 4K60 4:4:4 performance and HDR support require the use of USB 3.2 Gen 1 (5 Gbps) cables with support for DisplayPort Alt Mode (DisplayPort 1.4 video, 4K60 4:4:4, 2 lanes). Cables are sold separately.

3. The HD-TXU-4KZ-211 is engineered to deliver maximum compatibility with the widest possible range of USB devices. Crestron does not guarantee that all USB devices are compatible with the HD-TXU-4KZ-211.
4. The HD-TXU-4KZ-211 is powered by the included power pack. The HD-TXU-4KZ-211 cannot receive power from a remote DM Lite receiver.
5. For the USB-C DisplayPort input, CBL-USB3G1-C-C-6 and CBL-USB3G2-C-C-3 cables are sold separately.
6. The HDMI input requires an appropriate adapter or interface cable to accommodate a Dual-Mode DisplayPort or DVI signal. CBL-HD-DVI interface cables are sold separately.
