

# CRESTRON FLEX PODS **SCALABLE WIRELESS AUDIO**

## Key benefits

- Adapts to your different types of meeting spaces to deliver clear, consistent audio to every seat
- Can be moved as needed to ensure optimal range, reach, and collaboration
- Easily pair more units for complete coverage — even in the most complex configurations

## Bring audio to the people

We ask more from our meeting spaces than ever before. And Crestron Flex Pods deliver flexibility like nothing before — with audio that adapts to your different meeting types and spaces, even rooms not wired for audio, including BYOD spaces.

## Meet in more rooms. With less hassle.

Crestron Flex Pods let you use your spaces to collaborate your way. Wireless, modular, and scalable, easily pair more or move them around in any configuration, so everyone can hear and be heard clearly.

- Simple plug-and-play setup
- Mute, unmute, and volume control on every unit
- Long-distance DECT wireless signal keeps conversations secure
- Convenient to deploy and manage via XiO Cloud® platform

## Clear sound to every seat

Easily maneuver Crestron Flex Pods so sound fills the entire room and mics capture every word — while giving everyone mute, unmute, and volume control.

## Plug-and-play. Made to move.

Simply connect a Crestron Flex Pods Hub via USB to your native Microsoft Teams® or Zoom Rooms® devices. Or use them with AirMedia® wireless presentation and conferencing systems or your own BYOD meeting solution. Expand any setup by pairing more units with just the push of a button.
