

NEW ERA OF LIVING

Multiple elements united under the Crestron Home platform in this 'Best Integration Utilizing Crestron Partners/Extensions' winning project.

This 4,000-square-foot, two-story penthouse offers a perfect blend of contemporary design and expansive living space. With bespoke finishes and state-of-the-art amenities, every detail has been carefully curated to provide a modern yet inviting atmosphere. Situated in the prestigious location of Mumbai, India, this home provides luxurious city living and unparalleled convenience.

NAME OF PROJECT:

Mumbai Masterpiece

REGION:

Mumbai, India

DEALERS:

Beyond Automation Pvt. Ltd.

"CRESTRON HOME WAS THE PERFECT CONTROL SYSTEM TO IMPLEMENT INTO THIS HOME FOR THE CUSTOMIZATIONS THAT WERE REQUESTED."

Maulik Unadkat

Founder,
Beyond Alliance Pvt. Ltd.

THE CHALLENGE

The homeowner sought to elevate their living experience by incorporating smart controls for automated blinds, security, climate, and ambient lighting throughout their living space. On top of a standard home automation system, the homeowner requested additional third-party integrations to further strengthen security, ensuring peace of mind throughout the property.

THE SOLUTION

By implementing Crestron Home® OS, Beyond Automation delivered a comprehensive, customizable, and user-friendly solution that met the client's needs. Beyond Automation provided tailored features to fit lifestyle preferences and unite third-party integrations under one single interface with the Crestron Home OS.

"CRESTRON SOLUTIONS ARE VERY EASY TO WORK WITH AND PROGRAM. THE HOMEOWNERS HAVE SPECIFIC REQUIREMENTS FOR SCENES AND AUTOMATION THAT WE WERE ABLE TO FULFILL EASILY."

Maulik Unadkat
Founder,
Beyond Alliance Pvt. Ltd.

THE TECHNOLOGY

The homeowners placed great importance on customized scenes that aligned with their daily routines, including mood settings that adjust lighting, climate, and curtains to create the perfect atmosphere.

Automated lighting and controls not only enhance comfort but also contribute to energy efficiency, adjusting to various weather conditions for optimal performance, comfort, and energy conservation.

For enhanced safety, the homeowners implemented occupancy sensors for the lights and user-friendly controls, empowering the children to manage their environment with ease. In each bedroom, the wardrobes have ekey integrated fingerprint-activated locks to ensure personalized access and an extra layer of protection. These rooms also have Raylogic fan modules allowing each guest to easily control the ceiling fan in the room.

“CRESTRON'S INTEGRATION WITH THIRD-PARTY PARTNERS IS IMPECCABLE. WE WERE ABLE TO INTEGRATE MORE TECHNOLOGY INTO THE HOME TO DELIVER ON THE HOMEOWNERS' WANTS AND NEEDS.”

Maulik Unadkat
Founder,
Beyond Alliance Pvt. Ltd.

The homeowners were adamant about adding third-party security to the Crestron platform, allowing all controls to be accessed through a single interface. All integrated security, such as ekey locks, CCTV camera feeds, and Panasonic® video doorbells, is provided through the Crestron app. Tense keypads were implemented to blend harmoniously with their surroundings, and ceiling fans were installed that seamlessly integrates with the Crestron app. House staff receive limited access to the Crestron app to control common areas with restricted functionality for lights and curtains.

The Crestron Home OS is the backbone of the penthouse and provides seamless control across every room with customized controls and individual access levels to disable certain features for the kids or guests. The home has other amazing features including a luxurious media room with comfortable seating and a Dolby® surround sound system, an indoor bar for entertaining, and a Jacuzzi® tub in the primary suite.

"IMPLEMENTING A HOME AUTOMATION SYSTEM WAS THE RIGHT DECISION FOR US. WE LOVE THE IDEA OF SCENES, INSTEAD OF PUTTING ON EACH LIGHT INDIVIDUALLY, WHICH IS NOT THE CASE ANYMORE. AT THE PRESS OF A BUTTON, NOW WE CAN SET THE WHOLE HOUSE IN THE PERFECT MOOD."

Homeowner

RESULTS

The homeowners have a fully integrated Crestron automation system that enhances comfort, convenience, and security throughout the home. The system allows the homeowners to access all the third-party integrations through one interface instead of multiple different applications.

"The flexibility and integration capabilities of Crestron solutions ensured that every aspect of the client's vision was realized, resulting in a highly personalized and efficient smart home environment," says Maulik Unadkat, Founder, Beyond Alliance Pvt. Ltd.
