Statement of Memory Volatility for DM-NVX-351

Volatile and non-volatile memory information/configuration:

Type of Memory	Size of Memory	Purpose of this Memory	Data retention after power off **Note 1**	User data **Note 2**	How is data input to this memory?	How is memory protected from accidental overwrite by the user? (e.g. Password, Jumpers, Switch settings, Software) - Enter N/P if it can't be write protected.
1.EEPROM	4 Mega Bits	Device Config	No	No	Special software required	No User Access
2.SD CARD Internal	4 Giga Bytes	Boot Code	No	No	Factory Loaded	No User Access
3.FLASH PROM	1 Mega Bytes	Boot Code	No	No	Factory Loaded	No User Access
4.EEPROM	16 kilo Bits	Boot Code	No	No	Special software required	No User Access
5.SDRAM	2.5 Giga Bytes	Temporary Storage	No	Yes	Special software required	No User Access
6.FLASH PROM	32 Mega Bits	Boot Code	No	No	Special software required	No User Access
7.SDRAM	64 Mega Bits	Temporary Storage	No	No	Special software required	No User Access

Note 1: Can user data, i.e. Audio, Video, documents (Word, pdf etc.) or spreadsheet retain after power down?

Note 2: Can user data, i.e. Audio or Video, documents (Word, pdf etc.) or spreadsheet be written to this memory during normal operation? User settings and operational parameters such as volume setting, IP address etc. are not considered User data on this declaration. Only Audio, Video, documents (Word, pdf etc.) or spreadsheet is considered user data.
